### "RED GLOBE" PEACH

A New red-type Peach that is really "going places". Red Globe was released by the U. S. Dept. of Agriculture in 1954. It is the result from a cross between a seedling of Admiral Dewey x St. John and Fireglow. It is outstanding for its bright red-gold color and firm flesh. Ripens just a few days ahead of Halehaven. Fruit is round, medium to large in size, and about three-fourths of the skin surface is covered with a bright red blush over a yellow background. The flesh is very firm textured and of good flavor. It is especially free from any red color through the flesh. Excellent for canning and very attractive as a frozen product. Trees are productive and vigorous. A freestone. Its beautiful red coloring and early ripening means higher prices to the grower! Supply is limited — order early.

PRICE: 1-Yr., 7/16 in. trees, \$1.60 each; 2 for \$3.10; 5 for \$7.50; 10 for \$14.00. 9/16 in. trees, \$1.75 each; 2 for \$3.40; 5 for \$8.25; 10 for \$15.50.

### PAYMASTER STRAWBERRY

#### A GREAT NEW STRAWBERRY

(Midseason). This New variety will truly be the "PAYMASTER" on your farm! One Midwest grower reports he picked 800 sixteen-quart crates per acre. Paymaster is a cross of the Gem everbearer and the Premier. Berries are large, firm, sparkling red, sweet and high flavor. One of the best for freezing. As it originated in Michigan, is absolutely hardy. Is Red Stele resistant. We know we will not have enough plants to supply the demand, for the berries commanded highest prices on our local market this summer and all growers were demanding to know where the plants could be

bought. Order early, and be sure to get started with Paymaster this year! Price: 25 for \$1.75; 50 for \$2.75; 100 for \$4.35; 250 for \$8.75; 500 for \$12.50; 1,000 for \$22.50.

### No Cash Payment Before Shipment

You examine stock before you pay. This offer applies only on orders amounting to \$3.00 or more, for shipment on or before April 25, 1957.

We are one of the first nurseries in this section of the country to adopt this unique selling plan, whereby it is possible for customers to order without senders to order at full prices listed in catalog, and instruct us to ship C.O.D., express or parcel post, subject to your examination by express only, as the postal authorities do not permit examination of parcel post shipments. Look over the shipment and see for yourself whether the stock is in good condition. If shipment is satisfactory, pay your express agent the amount due and the plants are yours—still covered by our guarantee. What could be more fair? We simply must furnish good nursery stock or we couldn't possibly afford to make this offer.

We would advise all small shipments sent by mail, and will send your order by parcel post C.O.D. for purchase price, plus postage, if you prefer. All such shipments are fully covered by our guarantee.

**NOTICE:** The above offer does not apply on orders amounting to less than \$3.00; on Special Bargain Collections; Special Quoted Prices; nor on any orders specifying shipments later than April 25th, 1957. **WE GUARANTEE SAFE ARRIVAL OF ALL SHIPMENTS MADE ON OR BEFORE MAY 25th, 1957.**

We reserve the right to cancel all printed prices without notice.

### Order Early and Make a Big Saving 10% DISCOUNT ON ALL CASH ORDERS

(Except on Bargain Offers and Special Quotations), Received before February 1st, 1957.

To those who wish to send all cash with order, we offer these special cash discounts from our regular printed prices (except on Bargain Offers and special quotations).

### Pay Cash and Save Additional Cost on C.O.D. Shipments

Some concerns add 5 per cent to their list price, in addition to the required C.O.D. fees, if order is for C.O.D. shipment. Knowing our stock will be satisfactory, we will ship C.O.D., if you prefer, at our regular printed price, although we want to remind you of the collection and money order fees on C.O.D. shipments. These charges, over which we have no control, or do not receive one cent of the fees, amount to approximately 5 per cent on average orders. You can save this 5 per cent by sending cash with order. You take no chances—all shipments are backed by our guarantee.

Been using your stock 18 years, and think it the best money can buy.

F. W. Whitman

About 3 years ago, I sent to your nurseries for a Red Leaf Peach tree; today that tree is a lovely, 8-foot tree and this summer produced 250 small Peaches of a wonderful flavor.

## Jumbo Red Grape

Large as a Quarter

The Giant of all Grapes — Individual Kernels Size of a Plum. We introduced this variety in 1946. We believe it came from a sport or seedling as one vine was found in a vineyard of Concord some ten years ago; the fruit is entirely different than any variety we have ever seen. An amber-red when ripe, with individual kernels the size of a plum, in many cases. Bunches are compact, weighing one to two pounds. Very hardy. Will grow on most any soil. Makes one of the prettiest and tastiest jellies we know of — a bright, sparkling red, with a flavor all its own — not like common grape jelly.

As usual, our supply is very small, and we are again limiting each customer to twelve plants.

PRICE: 1-Yr. vines, 55c each; 6 for \$2.65; 12 for \$4.25. 2-Yr. vines, \$1.10 each; 3 for \$2.95; 6 for \$5.15.

### ROYAL RED LEAF PEACH

An ornamental tree with RED FOLIAGE — bright red early in the spring, gradually dulling to a deep maroon towards fall. Its deep rose blossoms against the red foliage create a most pleasing contrast. Produces full crops of perfectly round, inch and a half diameter peaches — just right for pickling. Fruit has all over red coloring; flesh is white with a delicious sweet flavor. Ripens late, with the Gold Drop. Our strain is far redder than foliage on most trees offered by other growers and therefore have named ours "Royal", this assures you of the genuine red strain.

PRICE: 1-Yr., 3-4 ft. trees \$1.35 each; 2 for \$2.20; 4 for \$4.00. 4-5 ft. \$1.85 each; \$3.00 for 2.

### 5-in-1 APPLE TREE

5 Kinds of Apples On One Tree! A Whole Orchard at Your Doorstep. The only Apple tree for the small home owner. No yard too small; can be planted in the front yard as well as the back. Will furnish plenty of shade, be highly ornamental, and also will produce a bountiful supply of five different kinds of Apples. The varieties are: Cortland, Jonathan, Red Delicious, Red Northern Spy, Red Rome Beauty and Yellow Transparent. These are five of the best standard varieties — Apples entire season.

PRICE: 3-Yr. branched, 9/16-11/16 in., 4-5 ft. trees, \$2.25 each; 2 for \$3.95. 4-Yr. Extra heavy, 5-6 ft. trees, \$3.25 each; 2 for \$5.75. Bearing age, 6-8 ft. trees, \$4.25 each; 2 for \$7.75. The 4-, and 5-Yr. trees cannot be mailed — express only.

I consider it almost a privilege to buy nursery stock from you. I don't know how you do it, especially shipping to me at such a distance, but so far I never lost a tree when I bought the stock from you. You are wizards in the business, and no wonder you have such a good name.

Your shipment arrived yesterday. Very much appreciate your wonderful packing and wrapping. Everything was alive and intact in spite of the long trip, and I am sure this was only due to your care in packing.

## ★ ★ new 20th century ★ ★ EVERBEARER

### AMERICA'S LARGEST EVERBEARER — HONEY SWEET

4-513 — A New Everbearer that has both "EYE" and "TASTE" appeal! PLUS being a "TOP PRODUCER". Bears fruit 60 days after planting. 3 Big Crops in 18 months. Bears until heavy frosts in the Fall. Excellent fresh or frozen — a flavor you'll never forget. Bright red color all the way through. Berries are round, of exceptionally large size from the first picking to the last. Fruit is uniform in size and has a rich red coloring all the way through; is very firm, which makes it excellent for distant shipping. FLAVOR of the best — we have never tasted a sweeter Everbearer — real honey-sweet! Also retains this delightful flavor when frozen. One of the best for freezing, jams and jellies.

**HEAVY PRODUCER.** Starts bearing 60 days after planting and continues until frost stops them in the fall. Its yields are very heavy; records indicate this variety has produced 750 pints of berries from 500 plants, from July through November. GROWS ON ANY SOIL.

Adaptable to all soils and all climates. You are always assured of a good fruiting row with 20TH CENTURY. This is our choice of all the Everbearers.

PRICE: 25 for \$2.45; 50 for \$4.65; 100 for \$7.95; 250 for \$18.35; 500 for \$32.00; 1,000 for \$57.00.

## new EARLY RED RED RASPBERRY

1-20 — Originated by Stanley Johnston of the South Haven Experiment Station. EARLY RED is a cross between Lloyd George and Cuthbert varieties. After 12 years of testing and growing on a commercial scale EARLY RED has proved its superiority. Berries ripen very early, are large, round-conic, and light red in color. Quality and flavor make them perfect for canning and freezing. Ripen 10 days earlier than Latham, thus commanding premium prices on the market. Plant is hardy, vigorous, and very productive. "EARLY RED" for Higher Prices, Early Ripening, Good Flavor and Quality, For Freezing, and Productiveness.

PRICE: 6 for \$1.75; 12 for \$2.95; 25 for \$5.35; 50 for \$9.25; 100 for \$16.00; 250 for \$37.50.

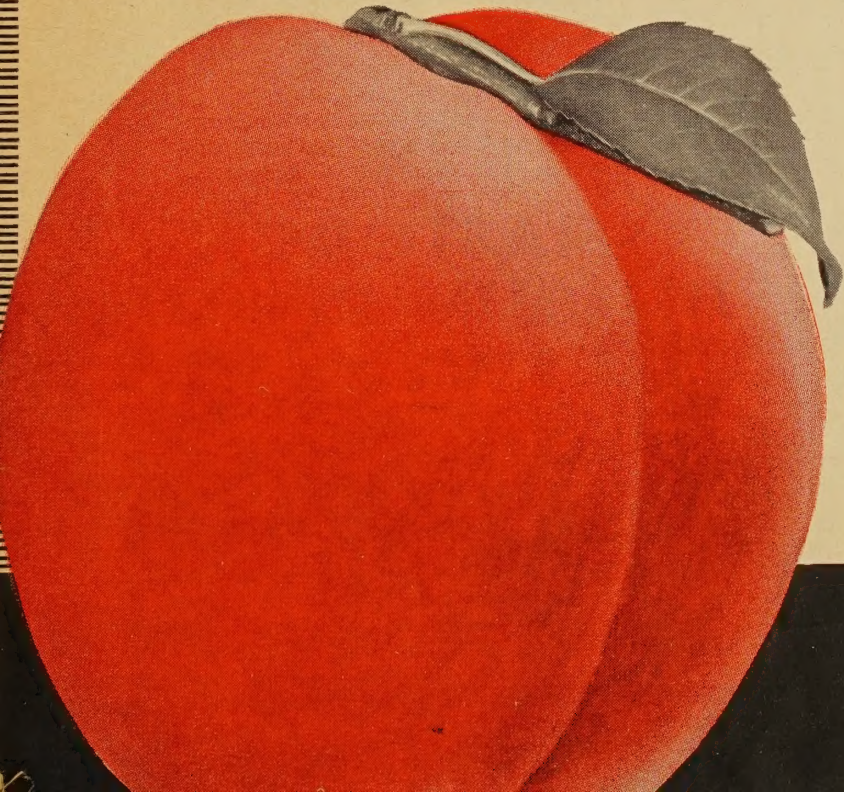

## RED-GOLD GIANT THE IMPROVED HALE!

**Bears Young - Fine Shipper - Exceptionally Hardy!**

1-38 — Truly the GIANT of the Peach family — many peaches weighing 1 pound each — the largest Peach we have ever seen. The new variety is a bud-sport of the common Hale, but is much larger, and bears heavier, with no signs of "little peach" so common in Hale. A late midseason variety that is almost fuzzless. Ripens a week later than J. H. Hale, when Peaches are bringing a premium price. A perfect freestone. An excellent shipper. Bears at an early age — often one-half bushel the second year. Very hardy. Tree is a more thrifty grower than Hale, and seems to be more resistant to brown rot than other kinds.

Bears Fruit from June to Frost!

4-508 — Berries are exceptionally large, roundish in shape; are dark red all the way through. Superfection has a zippy, sweet flavor, fairly melts in your mouth. An excellent plant maker. A hundred plants in your garden will produce enough berries for an average family. Premier

# Famous **PREMIER** Best Early **STRAWBERRY**

Still the leading early berry.

4-504 — A standard of excellence with all growers, and the earliest worthwhile Strawberry of the older varieties. A great money-maker, for it yields its fruit crop at a time when strawberries are in great demand and sell at fancy prices. Premier is as nearly frost-proof as any strawberry can be. It is unusually healthy, being free from leafspot and other diseases. Its deep, heavy roots enable it to withstand dry weather and mature a full crop of big berries when many varieties are a complete failure. Large, bright red, firm berries of fine texture and flavor.

PRICE: 25 for \$1.30; 50 for \$2.20; 100 for \$3.35; 250 for \$6.25; 500 for \$9.50; 1,000 for \$16.85; 2,000 for \$31.85.

#### STATE INSPECTED STRAWBERRY PLANTS

All of our Strawberry plants have been twice State-inspected; guaranteed to be true-to-name, disease-free, and to please you in every way.

## **ROBINSON** Best Late **STRAWBERRY**

4-506 — This berry was originated by John Haley of Southern Michigan. It is a cross between Premier and Washington. The best medium to late—10 days to 2 weeks later than Premier. In our 50 some years of growing strawberries, Robinson is the largest berry we have ever seen—30 berries will fill a quart. In fact, one of our Montana customers says some of her Robinson measure 6 to 6½ inches in circumference and inquired how much bigger they have grown, and one of our Michigan customers states he may elect to sell his berries by the dozen—or yard, for just 18 of the giant Robinson berries filled a quart container, and that they averaged “six berries to the foot.” This variety has been grown commercially for the past 20 years in Michigan; has produced a wonderful crop of fruit every year under most unfavorable conditions — farmers netted over \$1,000.00 an acre from this variety.

Berries are extremely large, and honey-sweet. Color is decidedly a cardinal-red, and this berry may be offered under this name. Berries have a firm, tough skin, making it an excellent shipper to distant markets.

Excellent plant maker on any soil.

Premier and Robinson, two of the best varieties, will give you berries over the entire season.

## FROM THESE 4 Varieties OF STRAWBERRIES

**New RED JUNE** A new variety that has good red color, beautiful form, and zippy flavor! A new variety with us, which seems to perform even better than the well-known favorite, Premier. The first berries ripen 4 to 5 days ahead of Premier. Has produced as much as 2 to 3 times as many berries as many varieties ripening in the same season, including Premier. Berries are of the same conical shape as Premier; the color is a bright scarlet-red with a light red center. An ideal variety for freezing. Makes a good picking row of strong vigorous plants. **PRICE: 25 for \$1.65; 50 for \$2.50; 100 for \$4.25; 250 for \$8.75; 500 for \$12.95; 1,000 for \$19.95.**

Red June

**DR. BURRILL** If you are looking for a dependable, all-purpose Strawberry, you will make no mistake in planting Dr. Burrill. It is a cross between the old "standby," Senator Dunlap, and Crescent; closely resembling Dunlap in appearance, but claimed by many to produce bigger, better berries, and more of them. Berries are of good size, very deep red in color, and so sweet it requires far less sugar than other varieties. Makes a good picking row of strong vigorous plants. Ripens mid-season. **PRICE: 25 for \$1.35; 50 for \$1.95; 100 for \$2.95; 250 for \$5.25; 500 for \$9.00; 1,000 for \$14.85.**

Cluster Beauty

**CLUSTER BEAUTY** Berries of this New Cluster Beauty are large in size throughout the entire picking season. Berries start ripening earlier than the Premier and are still producing berries after the Premier is gone. Produces nearly twice as many berries as other varieties in the same season. Berries are large and regular in size, the color is scarlet red with a light red center, making it an excellent variety for freezing; flavor is of the best, making it an excellent variety for fancy dessert, canning, and especially fine for freezing. Plants are sturdy, and very upright; fruiting stems are held well under the leaves which affords greater protection against freezing. Excellent plant maker. Tests have proven it will outproduce Premier by many quarts per acre. **PRICE: 25 for \$1.65; 50 for \$2.50; 100 for \$4.25; 250 for \$8.75; 500 for \$12.95; 1,000 for \$19.95.**

Dr. Burrill

**KARDINAL KING** An exceptionally good medium to late Strawberry. Ripens 8 to 10 days later than Premier. Berries are extremely large — 27 berries will fill a quart, and best of all — they are honeysweet and easy to pick. Berries have a firm, tough skin, making it an excellent shipper. This variety is sometimes sold as Scarlet Beauty, but is worthy of both names. Produces a well matted picking row on most any kind of soil. **PRICE: 25 for \$1.40; 50 for \$2.00; 100 for \$3.25; 250 for \$6.50; 500 for \$10.00; 1,000 for \$17.00.**

**Red Crop**

## **RED CROP** *The Newest* **JUNE-BEARER**

A new June-bearing variety, released by the New Jersey Experiment Station in 1950. Yields so heavy, your first glimpse at your patch during the peak of the harvest, tends to make you think of a "red-cover" — therefore, the name of "Red Crop". In New Jersey yields of from eight to ten thousand quarts per acre have been reported, although

most growers are picking somewhere around five thousand quarts per acre.

Red Crop is considered an early-mid-season variety. Plant growth is quite vigorous, making new runner plants quite freely, producing a very evenly spaced matted row. The berry is medium to large and very uniform in size; it is bright red throughout with no hollow center. It makes an excellent frozen product because of its high inside color. Its pretty bright green calyx make it sell on sight on the fresh strawberry market. Quality of fruit is good, comparing favorably with the well-known Premier. Flavor is of the finest — very sweet and delicious. It has grown well in soils that have had the common red stele root disease.

This wonderful variety more than merits a trial — we know you will like it.

**PRICE:** 25 for \$1.45; 50 for \$2.50; 100 for \$3.75; 250 for \$7.15; 500 for \$11.00; 1,000 for \$19.25.

Plants are vigorous and productive, making a good fruiting row, which means exceptionally heavy crops. Mortgage Lifter is hardy and very disease-resistant. With the heavy yields and large berries produced by this variety, your mortgage worries will be short-lived. Observations have proven this variety produces so heavy, 100 plants in your garden will provide enough fruit for an average family throughout the season, plus enough berries for your freezer. **What Is RA-PID-GRO?** It is a complete concentrated plant food formula. Easily made into an immediate effective liquid fertilizer by simply adding water. It will speed up growth of plants now in place and will assure more successful transplanting of new plants.

**HOW Is It Used?** Just add water at the rate of 1 pound of Ra-Pid-Gro to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around each plant according to directions on the bag. For use on small numbers of plants, mix at the rate of a teaspoonful to a quart of water. Also very valuable for use when transplanting. Dip plants in solution for three or four minutes. It will work almost unbelievable miracles in promoting rapid and healthy growth on all types of plants, as well as your lawn.

**Stop Expensive and Tragic Transplanting Losses.** By using a large tub or pail and mixing Ra-Pid-Gro with water at the rate of 22 gallons of water to one pound, you have a solution in which to dip the roots of the plants before setting out. If

# GRAPE VINES

## A Lifetime Investment

1E-27-Jumbo Red — See page 4

The Great INTERLAKEN SEEDLESS GRAPE. A California Seedless type That Is Hardy in the North. Interlaken was originated at the Experiment Sta. in Geneva, New York, by crossing the Thompson Seedless with the Ontario. It has proven hardy in temperature to 15 degrees below zero. The fruit is very sweet and of excellent flavor. The flesh is meaty and crisp and of excellent texture. The cluster of berries is of medium size, golden amber color. It ripens a full month before Concord — here in the North about Aug. 30th. This variety promises to become one of the leading fresh fruit grapes due to its hardiness, excellent quality and flavor. PRICE: 1-Yr. vines, 70c each; 3 for \$2.00; 6 for \$3.75; Strong, 2-Yr. vines, \$1.35 each; 2 for \$2.60; 5 for \$6.25.

New STEUBEN. A new introduction of a Blue-Black grape by the New York Experiment Station. Never have we tasted a Grape of such exquisite flavor. Melting, tender, sweet with a delicate perfume-like flavor. Fruit is of outstanding quality, and the vine very hardy; grows huge, perfectly formed, long slender clusters. Ripens a few days before Concord, but keeps well until Christmas. Has produced a full crop after 20 below zero temperatures. Vine is so vigorous, has produced grapes absolutely free from rot and mildew without spraying. We consider this the greatest blue Grape ever grown. PRICE: 1-Yr. vines, 70c each; 3 for \$2.00; 6 for \$3.75. Strong, 2-Yr. vines, \$1.35 each; 2 for \$2.60; 5 for \$6.25.

1E-25-GOLDEN MUSCAT. Possesses a rich color and the finest Muscat aroma of the European Muscat. For home use and roadside market, it is one of the best. The vine is vigorous, productive; the clusters are very large, tapering, single-shouldered and compact. The berries are large, oval, juicy, tender, sweet, vinous and aromatic. Ripens 10 days earlier than Concord. PRICE: 1-Yr. vines, 50c each; 6 for \$2.50; 12 for \$4.00.

Texture firm, like the California grape, and the skin can be eaten with the berry. Flavor is sweet and aromatic; texture is melting and tender. Moreover, it keeps well on the vine or off, in storage until Thanksgiving. PRICE: 1-Yr. vines, 35c each; 6 for \$1.85; 12 for \$3.00. 2-Yr. vines, 70c each; 3 for \$1.80; 6 for \$3.45.

1E-23-FREDONIA "The biggest money-maker of all times." (See what one of our customers say about this wonderful variety at bottom of page). Has produced as high as 2800 four-quart baskets per acre. Fredonia is one of the best early ripening black grapes, ripening 15 days earlier than Concord. The vine is very disease resistant, vigorous and productive — makes new wood so fast it bears the second year. Of finest quality; the clusters are large size, cylindrical and very compact, berries large, round, and hang well to the bunch. The skin is thick and tough, the flesh is juicy, solid, but tender. See price below.

1E-24-NIAGARA. The standard white Grape. Ripens with Concord. Bunch and berries large. Very hardy and productive. Excellent wine grape. Limit: 50 Niagara plants to each customer. See price below.

Gentlemen:

Charlotte, N. Car.

Received from you four years ago 250 Fredonia, Concord, and Niagara vines. Nothing is better than the Fredonia for this section — got \$6.50 per bushel for my entire crop at one market last year. I now have in my vineyard 41 varieties, and of these, 15 varieties are now bearing, but nothing beats the Fredonia! F.D. Wright.

## Sub-Zero ROSES

**Easy to Grow — Long to Live — Save  
REPLACEMENT EXPENSE**

These are the famous Brownell Sub-Zero Roses — a New Race of hardiness previously unknown in Roses. They are more vigorous, can live many times longer, are easier to grow, bloom more abundantly and more consistently, and their size, form and color compare with the best of the common Roses. Why? Because they are bred back to hardy species. They are super-hardy roses that absolutely won't kill out even in temperatures that dip 25 degrees below zero. The technical meaning of our "Sub-Zero" is wood safe to about 15 degrees below zero unprotected; hilled up with a little clean dirt 25 degrees below and colder; well hilled up about 95% safe at 50 degrees below. Because they are so hardy we guarantee them unconditionally to live through one year without winter killing. Best of all they are free blooming, and the flowers last a long time. We are offering this unique strain of roses in 5 varieties of Hybrid Tea Bush Roses and the same 5 varieties in Climbing type as follows:

**2-189 — Curley Pink.** Matchless in size and form of bloom, beauty of cluster, vigor. Many large, two-toned pink blossoms, of over 50 gracefully recurved petals.

**2-192 — Orange Ruffles.** One of the most beautiful Roses of all time. A gorgeous new color of orange never before found in Rose. It is luminous like glowing sunshine in the rain. Large flowers most singly on stems constantly in great abundance. As many as 50 petals gracefully warped, curled, frilled and ruffled, artfully shading from Capricorn Orange through Saturn to Saffron yellow. No black spot.

**2-191 — Red Duchess.** In over 50 years of hybridizing, never had we hoped to see a Rose produced like this. Such captivating fragrance. Such a shade of rose-red. Such colorful foliage. No blackspot. Very robust and sturdy. While all Sub-zero roses are pleasing fragrant, the magic of sunshine on these petals issues a new fragrance incomparably alluring in spicy sweetness and charm. **PRICE: \$2.00 each, Net.**

**2-193 — Helen Hayes.** The newest introduction. Has semi-double, luminous peaches and cream colored blooms, which are produced on a background of outstanding glossy foliage. Bush is practically free from thorns. **Price: \$2.50 each; 3 for \$6.00. THIS VARIETY NOT INCLUDED IN BARGAIN NO. 21.**

**2-196 — Yellow Ruffles.** A new Rose the same as Orange Ruffles except color is a beautiful fade-resistant yellow. Probably the only gorgeous Yellow Hybrid Tea Rose non-susceptible to blackspot.

**PRICE: All varieties listed (except Red Duchess and Helen Hayes) \$1.85; 3 for \$5.00. Net, no further discount. Red Duchess: \$2.00 each. Net.**

## HYBRID TEA ROSES

**The "Elite" of the Rose Family!**

**2-182 — COUNTESS VANDAL.** You will look a long time to find anything finer in the salmon-pink class than the Countess. It continually produces lovely long tapered buds of salmon-pink shaded with copper and gold which open to big, long-lasting, richly fragrant flowers on fine stems. Buds and flowers are usually perfect no matter what the weather, and the plant thrives and blooms consistently wherever roses are grown. **Price \$1.10 each; 3 for \$3.00.**

**2-33 — CRIMSON GLORY.** The beautiful, flaring, urn-shaped buds open into magnificent flowers of velvety crimson with black and maroon shadings. The richly perfumed bloom seems to glow like an ember when light is reflected from its velvety petals. Despite keen competition from more recently introduced red roses, Crimson Glory continues to be one of the most popular varieties in its color throughout the nation. The plant produces a continuous succession of flowers. **Price: \$1.10 each; 3 for \$3.00.**

**2-48 — ECLIPSE.** In our opinion no rose garden worthy of the name is complete without this variety. You will find yourself going to it again and again to cut the spicily fragrant, exquisitely beautiful buds. Of chrome yellow, they are slender, urn-shaped, and often more than two inches long. The plant is very vigorous, rather erect in habit, and always well covered with dark green leathery foliage. **Price: \$1.10 each; 3 for \$3.00.**

**2-42 — KONIGN LOUISE.** Beautiful ivory-white buds, about as perfect as any you will ever find, open to large, fully double globular flowers of milk-white. Splendid healthy plants and a good bloomer. **Price: \$1.10 each; 3 for \$3.00.**

Blue Leaf Arctic Willow

## TEUCRIM CHAMAEDRYS

An unusual Hardy Dwarf Hedge or Edging plant. Foliage is evergreen for 10 months of the year and plants stay dwarf. Ten to fifteen inches is as tall as they grow, and an occasional very light trimming will hold their beautiful compact shape. Hardy in all sections of the country, and thrives in most any location. Should be planted 6 inches apart for a dense hedge. Very effective when planted as an edging for a perennial bed. Four to five plants in a group will make an ideal corner clump for a perennial bed or the corners of a Rose garden. **Price:** 35c each; 6 for \$1.80; 12 for \$3.25; 25 for \$4.75; 100 for \$17.00.

## BLUE LEAF ARCTIC WILLOW. 3-366

(*Salix purpurea nana*). Here is a dwarf bush that is distinctly different in the way of a hedge plant. Foliage is of unusual blue-gray-green. Hardy enough to withstand Arctic Circle temperatures. Grows everywhere, even in wet or heavy soils where nothing else will thrive. Matures into a beautiful, thick hedge, up to 4 feet tall, and can be used favorably as a specimen. This Blue Leaf Willow is still uncommon and will attract attention and favorable comments wherever seen. Can be clipped for formal effect, or allowed to grow naturally, as it makes a dense globe-shaped bush. **PRICE:** 2-Yr., 15-18 in. bushes, 6 for \$2.95; 12 for \$5.50; 25 for \$10.45; 50 for \$19.50.

## VINCA MINOR MYRTLE

A trailing plant that spreads rapidly and makes a dense, compact growth. Attractive, glossy green leaves and lovely violet-blue flowers, tend to make this a showy and effective ground cover. Plants are hardy and trouble free; will thrive in sun or shade. Used extensively under shrubs and trees and on graves; also suitable for edgings to shrub borders, along wooded paths, etc. **Price:** 6 for \$1.25; 12 for \$2.25; 25 for \$3.85; 50 for \$7.35.

## EVERGREEN GROUND COVERS

These ground cover plants are one of the most useful groups that we grow. Each home-owner has a spot in his yard where it is difficult to grow or mow grass. These ground covers make ideal substitutes for grass and are beautiful the year around. Make a luxuriant growth in shade as well as in full sunlight. Are hardy and rapid growing. Plant one of the varieties offered below and you need not worry about how you are going to mow that hillside or slope.

## POLYGONUM REYNOUTRIA

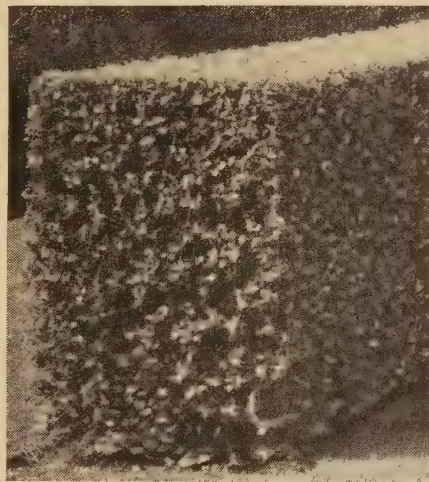

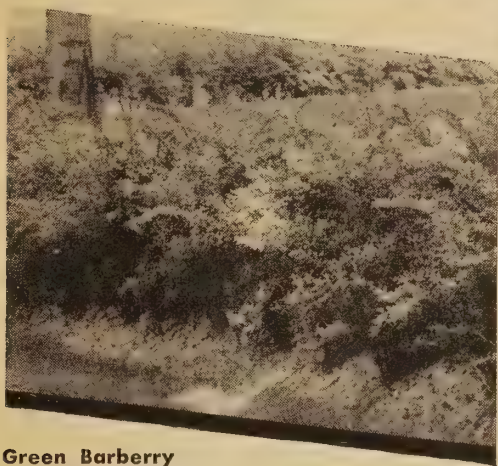

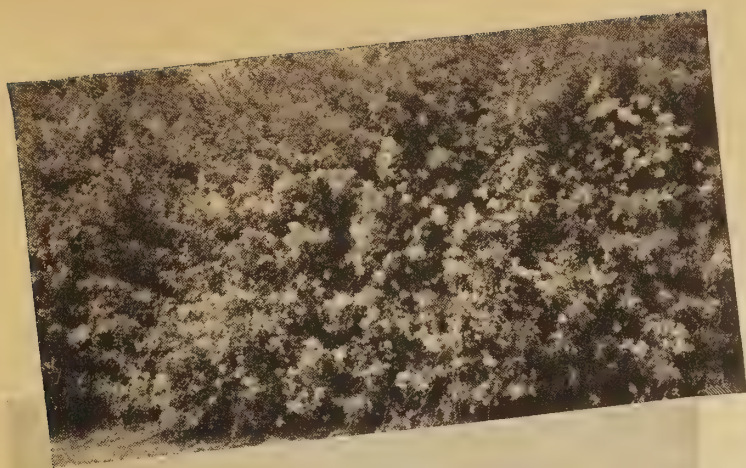

A dwarf-growing ground cover, which is completely covered with airy pink sprays of flowers in the Fall. Buds are deep red, adding to its charm. Foliage is pale green, which turns to a brilliant red in autumn. Very hardy, easy culture; does best in full sun — in fact, one of the best ground covers for sunny places where Vinca and Pachysandra would not grow. **Price:** 6 for \$1.65; 12 for \$3.10; 25 for \$5.50.

## PACHYSANDRA TERMINALIS

A ground cover, which will grow in all shady situations and the only plant which will thrive under pine trees. A trailing plant with beautiful waxy green leaves that stay green all winter. Plants make a dense growth, spread out rapidly and should be set 1 to 2 feet apart. Its main uses are for planting under evergreens, under all shrub plantings, or for shrub and flower bed borders, for bordering walks and drives, etc. **Price:** 6 for \$1.25; 12 for \$2.25; 25 for \$3.85; 50 for \$7.35; 100 for \$14.00.

The hedge, limbs clear to the ground, is a bright rich green from very early spring, as it is much earlier than other hedges and carries the foliage, which colors with frost, way into the fall. Trim same as Privet or other hedges. 2-Yr. 2-3 ft. 6 for 95c; 12 for \$1.75; 25 for \$3.00; 50 for \$4.75; 100 for \$8.50.

Sure to Fruit Bittersweet

## SURE TO FRUIT BITTERSWEET

**2-105—(Celastrus Loeseneri).** Chinese Bittersweet. The most prolific fruiting variety known. The ordinary Bittersweet often fails to fruit. In this variety we offer you a Bittersweet that always fruits. This rare species was imported from Central and Western China. The leaves are a glaucous green and somewhat larger than those of the common Bittersweet. It grows rapidly in any kind of soil, in sun or partial shade. In autumn yellow and orange-scarlet berries cover the vine all over instead of an occasional small cluster as in the common kind. Besides their value in destroying insects, many species help in keeping down weeds. Offer the birds board and lodging by planting berry producing shrubs, and you will have a host of willing helpers, working tirelessly for you throughout the whole year.

**3-228 — LOCUST, Moraine.** (Plant Pat. No. 836). America's Great New Shade Tree that is Thornless, Seedless, Fast Growing, Long Lived, and one which will grow anywhere. It is a round headed tree when young but tall and vase-shaped when older. Mature trees are 80 to 100 feet in height with lower branches high enough to clear any ranch-type house. The finely cut foliage allows enough light to filter through to promote excellent growth of lawns, yet provides shade dense enough to discourage growth of crabgrass. Very little pruning is needed as the lower limbs self prune as the tree grows. As it is sterile, there are no unsightly seed pods to clutter up the lawn. Tests show this new tree to grow more rapidly than either Silver Maple or Chinese Elm. It withstands drought, heat and cold. Excellent for either lawn or street planting. Fine 5 to 6 ft., BRANCHED TREES, \$5.50 each; 2 for \$10.00. Net, not subject to a discount.

**New "HARLEQUIN" Variegated-Leaved Maple.** In our opinion, Harlequin is the most beautiful shade tree in existence today. It is a Norway Maple with a variegated leaf. Quite a sensation with its leaves that are green in the center with a beautiful ivory edging. The symmetrical, round top makes it a beauty, and it grows to about 30 ft. Can be grown anywhere that Norway Maple can. 5-6 ft. trees, \$4.50 each; 2 for \$8.50.

**LOMBARDY POPLAR.** Tall, slender growing tree, appearing as tall sentinels at a distance. Dark green leaves, lighter shade on under side. Ideal for screening, windbreaks and back-grounds. Grow very rapidly. 4-5 ft. trees, \$1.00 each; 3 for \$2.75. 5-6 ft. trees, \$1.45 each; 3 for \$3.95.

TREE PEONIES are a low many branched shrub, growing 3 to 4 feet high, bearing giant size flowers in many shades of red, pink, purple, white and bi-color. They have been grown in China for a thousand years, first in the gardens of the Ming Emperors, where they gained the name "THE IMPERIAL FLOWER OF CHINA". The Chinese also call them "THE KING OF FLOWERS" because of their rare beauty and king-size blossoms. The flowers often measure 10 to 12 inches across, and have the texture of fine crepe silk. They are fragrant. They are hardy — long lived — disease resistant. Grow well in any climate. Have been known to withstand 40 degrees below zero temperature. Need very little care. The sparkle and beauty of TREE PEONIES in full bloom are beyond description, and are even more spectacular and beautiful than the finest hybrid Rhododendron.

## RED SILVER FLOWERING CRAB

**3-227** — In our opinion, the most colorful Flowering Crab ever introduced! Completely red in flower, leaf bark and fruit — rich maroon-red from top to bottom. Most flowering Crabs are preferred due to the mass of blooms which they produce for a short time, but the Red Silver is beautiful from spring until late fall because of its all-over red color. The leaves are somewhat cut-leaf, the under side of which are somewhat tinseled with silver — the blend of maroon and silver is a unique combination throughout the season. The wonderfully fragrant red flowers are large, partially double and altogether lovely. Delightful red fruits in the fall. **Price:** 2-Yr., 3-4 ft., \$2.45 each; 2 for \$4.45.

# HYBRID BUSH CHERRIES

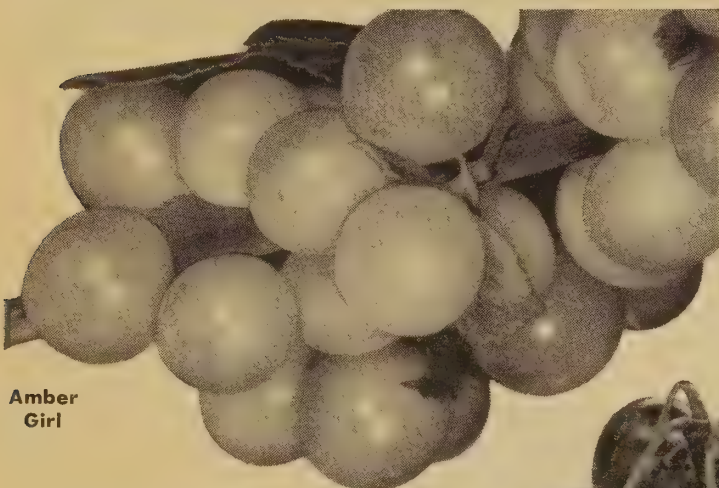

**Make an Ideal Bush or Hedge that Bears Delicious Fruit**

Now we are in a position to supply a Hybrid Bush Cherry which will provide Cherries for those of you who are out of the regular Cherry country — plant these hybrid bush cherries and enjoy the fruit just as much as you would regular cherries. Cherries produced on these bushes are much larger and tastier than those produced by the old Hansen Bush Cherries and are better growers. These are budded on American plums, and should be hardy anywhere. Should a wild plum stalk with large, dull leaves come shooting up through the shiny leaf Bush Cherry, be sure and trim it out. Not only do they produce delicious Cherries, but they provide an ideal hedge or screen. Foliage on these hybrid bushes is so heavy, it hides the fruit from the birds. **We are offering six varieties in this wonderful Hybrid Bush Cherry.** Be sure and specify the variety you wish.

### RED DOLGO CRAB

3-327 — We know you will say "Dolgo is the Best Tree on the Place," when it starts to bear. A fruit tree that is attractive enough to plant in your lawn as a flowering crab. Clouds of dainty blooms in early spring, followed by unbelievable "red" fruit. Tree is dwarf

in size, but grows fast. Bears very young, often the second year. Apples are bright red in summer, deepens to blood-red in autumn, then wine-red as leaves turn yellow. Fruit clings to tree until long after frost. Very hardy. Very good for pickles and jellies; sauce has lots of zip and it doesn't taste like usual Apple Sauce. Even when ripe, the fruit has so much pectin that the pickle juice will jell. **PRICE: 4-5 ft. trees, \$1.10 each; 3 for \$2.75; 10 for \$8.75. SEE PAGE 55 FOR BEARING-AGE, RED DOLGO.**

There's a Difference. Northern Grown. Buds Especially Selected from Heavy Bearing Trees; Insures a Bumper Crop. Absolutely true-to-name, vigorous, well-grown, perfectly healthy, with well-ripened wood and splendid roots. Guaranteed to reach you in good growing condition.

**1-30 → Elberta.** Standard market peach of the entire country. Very large; yellow with red blush; flesh is yellow, tender, and juicy; very highly flavored. Rank, vigorous grower. Ripens middle of September. Freestone and self-fertile.

**1-23 → Fairhaven — The New Wonder Peach.** Early Ripening — Heavy Producer — Hardy. At least half of the fruits of Golden Jubilee will have been picked when Fairhaven begins. Fruit is medium-large, nearly round, bright golden in color, with a bright red cheek. Skin smooth and tough. It resists browning, which is a great advantage, especially in processing. The stone is free when fully ripe. Heavy producers.

**1-31 → Golden Jubilee.** Tree habits and fruit resemble Elberta but ripens about a month earlier. The skin is yellow with red blush; flesh golden yellow, juicy, tender, sweet and freestone. Very hardy.

**1-35 → J. H. Hale.** Ripens 5 days earlier than Elberta, is larger and superior flavor; beautiful golden yellow with carmine blush, smooth, fuzzless. Freestone.

**1-36 → Hale-Haven.** A cross between South Haven and J. H. Hale. Freestone. Strong grower, very hardy, heavy bearer; excellent flavor. Ripens 15 days earlier than Elberta. **The best yellow freestone we have ever offered.**

**1-33 → Perfect Hale. A Profit Producer.** This variety will produce full crops of beautiful large peaches, entirely free from all so-called "buttons" so prevalent in J. H. Hale, for it is self-fertile. Season little later than Elberta. Fruit very large; flesh yellow, with deep carmine blush. Very hardy freestone. Splendid market variety.

**1-34 → Red Haven.** An excellent early maturing peach. **RIPENS 30 DAYS EARLIER THAN ELBERTA.** Yellow freestone, almost completely covered with a brilliant red color; sweet in flavor. Firm flesh and tough skin. Heavy producer. Fruit buds much hardier than Elberta.

# 3 New Peaches You Will Find Profitable

## ✓ **RED SKIN** NEW RED COLOR!

3-324 — Hardy-Productive, Large, Beautiful and Delicious! All five characteristics wrapped up in this one wonderful new Peach. Although this variety was released by the Maryland Agriculture Experiment Station about ten years ago, it is a new variety to the Central and Midwestern states. **Redskin** is a cross between the well-known J. H. Hale and Elberta varieties. Is a freestone peach, ripening with Elberta, and has a beautiful red color. The good qualities of both Hale and Elberta have been combined so that we predict Redskin will eventually become as popular commercially as Elberta is today. The fruit is round and yellow-fleshed with little or no red near the pit, and develops good size even with a heavy load. Delicious flavor, making it ideal for dessert or canning purposes. Excellent shipping qualities.

As this variety is an extremely vigorous grower, we recommend planting not more than 75 trees to the acre. Also, as Redskin is both winter-hardy in bud and cold-resistant in blossom, the tree will produce exceptionally heavy loads of Peaches, you will have to thin very heavily so as to prevent tree breakage, and at the same time, be assured of real large fruit.

Redskin is self-pollenizing. Due to its red color, size and excellent qualities, superior prices have been received for this variety during the latter a season. Supply is very limited—order early.

## ✓ **YELLOW-GOLD GIANT**

1-39A In our estimation, the BEST yellow Peach introduced to date. **HARDINESS — GREAT BEAUTY — HIGH QUALITY** all in one wonderful peach! A peach that has everything desirable in a yellow free-stone, including hardiness. Peach is exceptionally large, perfectly round, and so brilliant yellow in color it appears to be "shimmering gold" — so yellow, in fact, one does not notice that it has a slightly red cheek. Fruit is equally as large as the well-known J. H. Hale, but is self-fertile; is highly flavored and an exceptionally good variety for canning. Skin is very firm, which means excellent shipping qualities. Yellow-Gold Giant ripens about the same as Elberta — early in September. This is a self-fertile variety and a freestone. Tree is hardy and a good producer.

This is a "must" for every gardener who makes a specialty of including only the best in plantings. Supply is limited — order early.

## ✓ **AMBER GEM—Best for Canning**

1-32 — This grand variety is a semi-cling; shaped like an Elberta and ripens same time. Beautiful yellow flesh with deep red blush; delicious honey-sweet flavor. Will hang on the tree for 10 days to 2 weeks after it ripens. One of the largest peaches grown. Used extensively by all canning factories. Hardy and very productive.

## New MONTMAMMOTH CHERRY

3-312 — This variety was found by Lee McClain, of Knox County, in 1928. A sport of the Montmorency. Bears the second year — no waiting for fruit. High quality cherries are large, often calipering an inch in diameter. As the tree is dwarf and spreading in growth, it is much easier

to pick than other varieties, as the bulk of the crop can be harvested from the ground. Heavy producer — 3 to 5 fruits per spur. The parent tree was one year old when planted, which was 28 years ago, and it produced a

6-gallon crate of fruit the third year. Due to its many fine points, Montmammoth has rapidly taken the place of most all other sour Cherries.

PRICE: 1-Yr., 2-3 ft. trees, \$1.45 each; 3 for \$4.15; 10 for \$12.95; 25 for \$30.00

## LARGE MONTMORENCY Sour Cherry

### New CANBY RED RASPBERRY

This new raspberry was developed at the Oregon Experiment station, a seedling of the cross of Viking Lloyd George. We fruited the Canby for the first time last year, and find it to be the largest and best Red raspberry we have ever seen in our 60 years of fruit growing. Canes are completely FREE OF THORNS making it easy to pick the fruit. Berries are a bright, medium-light red, exceptionally LARGE in size and very thick-meated with small core; distinct raspberry flavor, with far less acid than most red raspberries, making it an ideal dessert berry. A superior variety for long distant shipping because of its outstanding firmness. An exceptionally vigorous grower, with large stocky canes. Commands highest prices, for it is early ripening. Here in Michigan, it ripened the last week in June. We believe it is going to take the place of all red raspberries for home or commercial purposes. Price; 1-Yr. No. 1 plants, 6 for \$1.75; 12 for \$3.00; 25 for \$5.00; 50 for \$8.50; 100 for \$15.00; 250 for \$35.00.
